

Catalog Number: 101814, 194679

Glutathione Reduced

Structure:

Molecular Formula: C₁₀H₁₇N₃O₆S

Molecular Weight: 307.3

CAS # : 70-18-8

Synonym: γ -L-Glutanyl-L-cysteinyl glycine

Physical Description: White crystalline powder

Solubility: Soluble in water

Description: A useful tripeptide involved in many aspects of metabolism, including transport of γ -glutanyl amino acids and reductive cleavage of disulfide bonds

Availability:

Catalog Number	Description	Size
101814	Glutathione reduced	1 g 5 g 10 g 25 g 50 g 100 g
194679	Glutathione reduced, cell culture reagent	5 g 10 g 25 g 100 g
