

Thermo Scientific Adhesive Plate Seals

Description: A polyvinylidene chloride (PVdC) coated polypropylene seal with an acrylic adhesive. The film offers a convenient and cost effective adhesive cover for long and short-term storage. The non-adhesive tab allows quick removal and the film also creates a good reseal on top of a pierced foil seal.

Ordering Information: AB-0580 Adhesive Plate Seals 100 sheets

Physical Properties: Seal thickness: 55µm (without release liner)
Temperature range: -20°C to 80°C

Note: This product is **not** recommended for high temperature applications such as PCR or for storing at temperatures below -20°C.
