

Anti-Human CD31 (PECAM-1) FITC

Catalog Number: 11-0319

Also known as: Platelet-Endothelial Cell Adhesion Molecule 1

RUO: For Research Use Only. Not for use in diagnostic procedures.

Staining of normal human peripheral blood cells with Mouse IgG1 K Isotype Control FITC (cat. 11-4714) (blue histogram) or Anti-Human CD31 (PECAM-1) FITC (purple histogram). Cells in the granulocyte gate were used for analysis.

Product Information

Contents: Anti-Human CD31 (PECAM-1) FITC

Catalog Number: 11-0319

Clone: WM-59 (WM59)

Concentration: 5 µL (0.5 µg)/test

Host/Isotype: Mouse IgG1, kappa

HLDA Workshop: V P025

Formulation: aqueous buffer, 0.09% sodium azide, may contain carrier protein/stabilizer

Temperature Limitation: Store at 2-8°C. Do not freeze. Light sensitive material.

Batch Code: Refer to vial

Use By: Refer to vial

Description

The WM59 monoclonal antibody reacts with human CD31, also known as platelet-endothelial cell adhesion molecule-1 (PECAM-1) and gpIIa. This 130-140 kDa surface protein is expressed by endothelial cells and at low levels on leukocytes and platelets. It has been reported that CD38 binds to CD31. Homotypic interaction of CD31 is important in adhesion, cell-cell and cell-matrix interaction, and signal transduction.

Applications Reported

The WM-59 (WM59) antibody has been reported for use in flow cytometric analysis.

Applications Tested

This WM-59 (WM59) antibody has been pre-titrated and tested by flow cytometric analysis of human peripheral blood leukocytes. This can be used at 5 µL (0.5 µg) per test. A test is defined as the amount (µg) of antibody that will stain a cell sample in a final volume of 100 µL. Cell number should be determined empirically but can range from 10⁵ to 10⁸ cells/test.
