

Anti-Mouse ESAM FITC

Catalog Number: 11-5852

Also Known As: Endothelial cell-Selective Adhesion Molecule

RUO: For Research Use Only

Staining of the bEnd.3 cell line with 0.25 µg of Rat IgG2a κ Isotype Control FITC (cat. 11-4321) (open histogram) or 0.25 µg of Anti-Mouse ESAM FITC (filled histogram). Total viable cells were used for analysis.

Product Information

Contents: Anti-Mouse ESAM FITC

REF Catalog Number: 11-5852

Clone: 1G8

Concentration: 0.5 mg/ml

Host/Isotype: Rat IgG2a, κ

Formulation: aqueous buffer, 0.09% sodium azide, may contain carrier protein/stabilizer

 Temperature Limitation: Store at 2-8°C. Do not freeze. Light sensitive material.

LOT Batch Code: Refer to Vial

 Use By: Refer to Vial

 Caution, contains Azide

Description

The 1G8 monoclonal antibody reacts with mouse ESAM (endothelial cell-selective adhesion molecule). ESAM is a 55-kDa membrane protein composed of 2 extracellular Ig domains, a single transmembrane domain, and a 120 amino acid cytoplasmic domain. ESAM is related to members of the junctional adhesion molecule (JAM) family, and is expressed on endothelial cells and activated platelets. ESAM at endothelial tight junctions plays a role in the regulation of vascular permeability, in response to agents such as VEGF or extravasating neutrophils.

Applications Reported

This 1G8 antibody has been reported for use in flow cytometric analysis.

Applications Tested

This 1G8 antibody has been tested by fluorometric analysis. This can be used at less than or equal to 0.5 µg per test. A test is defined as the amount (µg) of antibody that will stain a cell sample in a final volume of 100 µL. Cell number should be determined empirically but can range from 10⁵ to 10⁸ cells/test. It is recommended that the antibody be carefully titrated for optimal performance in the assay of interest.
