

Anti-Human CD303a FITC

Catalog Number: 11-9818

Also known as: BDCA-2, CLEC4C

RUO: For Research Use Only. Not for use in diagnostic procedures.

Staining of normal human peripheral blood cells with Anti-Human CD123 APC (cat. 17-1239) and Mouse IgG2a K Isotype Control FITC (cat. 11-4724) (left) or Anti-Human CD303a FITC (right). Cells in the monocyte gate were used for analysis.

Product Information

Contents: Anti-Human CD303a FITC

Catalog Number: 11-9818

Clone: 201A

Concentration: 5 uL (0.125 ug)/test

Host/Isotype: Mouse IgG2a, kappa

Formulation: aqueous buffer, 0.09% sodium azide, may contain carrier protein/stabilizer

Temperature Limitation: Store at 2-8°C. Do not freeze. Light-sensitive material.

Batch Code: Refer to vial

Use By: Refer to vial

Contains sodium azide

Description

This 201A monoclonal antibody reacts with human CD303a, which is also known as CLEC4C or Blood Dendritic Cell Antigen 2. This type II transmembrane protein is expressed almost exclusively on plasmacytoid dendritic cells, which secrete type I interferon during antiviral and antitumor responses. Studies have demonstrated that CD303a binds asialo-galactosyl-oligosaccharides on invading pathogens, resulting in the activation of signaling pathways that lead to CD303a internalization and downregulation of interferon production.

Applications Reported

This 201A antibody has been reported for use in flow cytometric analysis.

Applications Tested

This 201A antibody has been pre-titrated and tested by flow cytometric analysis of normal human peripheral blood. This can be used at 5 µL (0.125 ug) per test. A test is defined as the amount (ug) of antibody that will stain a cell sample in a final volume of 100 uL. Cell number should be determined empirically but can range from 10⁵ to 10⁸ cells/test.
