

Anti-Human A20 Purified

Catalog Number: 60-6629

RUO: For Research Use Only

Product Information

Contents: Anti-Human A20 Purified

 **Catalog Number:** 60-6629

Clone: 59A426

Host/Isotype: Mouse IgG1

Formulation: aqueous buffer, 0.09% sodium azide, may contain carrier protein/stabilizer

 **Temperature Limitation:** Store at 2-8°C. Avoid repeated freeze/thaw cycles.

 **Batch Code:** Refer to Vial

 **Use By:** Refer to Vial

 **Caution, contains Azide**

Description

The 59A426 antibody reacts with human A20. The zinc finger protein A20 is a tumor necrosis factor and interleukin-1 (IL-1) inducible protein that negatively regulates NF kappa B gene expression. A20 inhibits NF kappa B dependent gene expression by interfering with a novel TNF-induced and RIP- or TRAF2-mediated pathway that is different from the NF kappa B kinase pathway. Full-length recombinant A20 protein was used as an immunogen.

Applications Reported

The 59A426 antibody has been reported for use in immunoblotting (WB).

Applications Tested

The 59A426 antibody has been tested by immunoblotting of whole cell lysate from Daudi cells and can be used at > 3 ug/mL. A band at ~70 kDa is detected.
