

Anti-Mouse CD183 (CXCR3) PE

Catalog Number: 12-1831

Also known as: C-X-C chemokine receptor type 3, IP-10 receptor

RUO: For Research Use Only. Not for use in diagnostic procedures.

Staining of C57Bl/6 splenocytes with Anti-Mouse CD4 PerCP-eFluor® 710 (cat. 46-0042) and 0.125 ug of Armenian Hamster IgG Isotype Control PE (cat. 12-4888) (left) or 0.125 ug of Anti-Mouse CD183 (CXCR3) PE (right). Total viable cells were used for analysis.

Product Information

Contents: Anti-Mouse CD183 (CXCR3) PE

Catalog Number: 12-1831

Clone: CXCR3-173

Concentration: 0.2 mg/mL

Host/Isotype: Armenian Hamster IgG

Formulation: aqueous buffer, 0.09% sodium azide, may contain carrier protein/stabilizer

Temperature Limitation: Store at 2-8°C. Do not freeze. Light sensitive material.

Batch Code: Refer to vial

Use By: Refer to vial

Description

The monoclonal antibody CXCR3-173 recognizes mouse CD183 also known as CXCR3. CD183 is a seven transmembrane G-protein like chemokine receptor which binds three ligands; CXCL9 (mig), CXCL10 (IP-10) and CXCL11 (ITAC). CD183 has been shown to play a role in CD4 T cell responses to grafts. CXCR3 knockout mice have compromised allograft rejection responses. Expression is found on NK cells, a subset of T lymphocytes and a subset of Tregs as well as preferential expression on Th1-polarized cells.

The antibody CXCR3-173 has been shown to affect chemotaxis in response to ligand. The presence of ligand eliminates staining with the antibody. *In vivo* addition of the antibody delays cardiac and pancreatic islet allograft rejection.

Applications Reported

This CXCR3-173 antibody has been reported for use in flow cytometric analysis.

Applications Tested

This CXCR3-173 antibody has been tested by flow cytometric analysis of mouse splenocytes. This can be used at less than or equal to 0.25 µg per test. A test is defined as the amount (µg) of antibody that will stain a cell sample in a final volume of 100 µL. Cell number should be determined empirically but can range from 10⁵ to 10⁸ cells/test. It is recommended that the antibody be carefully titrated for optimal performance in the assay of interest.
