

Anti-Human IFN gamma PE

Catalog Number: 12-7319

Also known as: Interferon gamma

RUO: For Research Use Only. Not for use in diagnostic procedures.

Intracellular staining of stimulated normal human peripheral blood cells with Anti-Human CD8a PerCP-eFluor[®] 710 (cat. 46-0087) and Mouse IgG1 K Isotype Control PE (cat. 12-4714) (left) or Anti-Human IFN gamma PE (right). Cells in the lymphocyte gate were used for analysis.

Product Information

Contents: Anti-Human IFN gamma PE

Catalog Number: 12-7319

Clone: 4S.B3

Concentration: ug size: 0.2 mg/mL; test size: 5 uL (0.125 ug)/test

Host/Isotype: Mouse IgG1, kappa

Formulation: aqueous buffer, 0.09% sodium azide, may contain carrier protein/stabilizer

Temperature Limitation: Store at 2-8°C. Do not freeze. Light sensitive material.

Batch Code: Refer to vial

Use By: Refer to vial

Caution, contains Azide

Description

The 4S.B3 monoclonal antibody reacts with interferon gamma (IFN gamma). The 4S.B3 antibody is a neutralizing antibody. Human IFN gamma is a 17 kDa factor produced by activated T and NK cells and is an anti-viral and anti-parasitic cytokine. IFN- γ in synergy with other cytokines, such as TNF alpha, inhibits proliferation of normal and transformed cells. Immunomodulatory effects of IFN gamma are exerted on a wide range of cell types expressing the high affinity receptors for IFN gamma. Glycosylation of IFN gamma does not affect its biological activity.

Applications Reported

The 4S.B3 antibody has been reported for use in intracellular flow cytometric analysis.

Applications Tested

This 4S.B3 antibody is offered in 2 formats:

- μ g size: has been tested by flow cytometric analysis of activated human cells. This can be used at less than or equal to 0.25 μ g per test. A test is defined as the amount (μ g) of antibody that will stain a cell sample in a final volume of 100 μ L. Cell number should be determined empirically but can range from 10^5 to 10^8 cells/test. It is recommended that the antibody be carefully titrated for optimal performance in the assay of interest.

- test size: has been pre-titrated and tested by flow cytometric analysis of activated human cells. This can be used at test size: 5 μ L (0.125 μ g) per test.
