

Anti-Human/Mouse CD282 (TLR2) PE

Catalog Number: 12-9024

Also Known As: TLR-2, toll-like receptor 2

RUO: For Research Use Only

Staining of C57BL/6 splenocytes with Anti-Mouse CD11b FITC (cat. 11-0112) and 0.125 μ g of Mouse IgG1 κ Isotype Control PE (cat. 12-4714) (left) or 0.25 μ g of Anti-Human/Mouse CD282 (TLR2) PE (right). Total viable cells were used for analysis.

Product Information

Contents: Anti-Human/Mouse CD282 (TLR2) PE

REF Catalog Number: 12-9024

Clone: T2.5

Concentration: 0.2 mg/ml

Host/Isotype: Mouse IgG1

Formulation: aqueous buffer, 0.09% sodium azide, may contain carrier protein/stabilizer

 Temperature Limitation: Store at 2-8°C. Do not freeze. Light sensitive material.

LOT Batch Code: Refer to Vial

 Use By: Refer to Vial

 Caution, contains Azide

Description

The T2.5 monoclonal antibody reacts with mouse and human Toll-like receptor 2 (TLR2). Mouse TLR2 is expressed by the myeloid lineage, including macrophage and dendritic cells in splenocytes and the RAW264.7 cell line. To date, at least twelve members of the Toll family have been identified in human and mouse. This family of type I transmembrane proteins is characterized by an extracellular domain with leucine-rich repeats and a cytoplasmic domain with homology to the type I IL-1 receptor. Two of these receptors, TLR2 and TLR4, are pattern recognition receptors and signaling molecules in response to bacterial lipoproteins and have been implicated in innate immunity and inflammation. TLR2 is expressed on the surface of cells and is responsible for distinguishing different pathogens. T2.5 is an antagonistic antibody.

Applications Reported

The T2.5 antibody has been reported for use in flow cytometric analysis.

Applications Tested

The T2.5 antibody has been tested by flow cytometric analysis of mouse splenocytes. This can be used at less than or equal to 0.5 μ g per test. A test is defined as the amount (μ g) of antibody that will stain a cell sample in a final volume of 100 μ L. Cell number should be determined empirically but can range from 10^5 to 10^8 cells/test. It is recommended that the antibody be carefully titrated for optimal performance in the assay of interest.
