

Purified anti-mouse/human CD258 (LIGHT)

Catalog # / Size: 137102 / 500 µg

Clone: 15B2

Isotype: Mouse IgG1, κ

Immunogen: Recombinant extracellular domain of murine LIGHT

Reactivity: Mouse, Human¹

Preparation: The antibody was purified by affinity chromatography.

Formulation: Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide.

Concentration: 0.5 mg/ml

Storage: The antibody solution should be stored undiluted at 4°C.

Applications:

Applications: ELISA - *Quality tested*
IP - *Reported in the literature*

Recommended Usage: Each lot of this antibody is quality control tested by ELISA. For ELISA, the suggested use of this reagent is 10 µg/ml. It is recommended that the reagent be titrated for optimal performance for each application.

Application Notes: Additional reported applications (for relevant formats) include: *in vivo* blocking of LIGHT activity in a DSS-induced acute intestinal inflammation model¹; *in vitro* blocking of the LIGHT-induced expression of CXCL8/CXCL2 by BFS-1 and A375 cells¹, and immunoprecipitation¹.

Description: CD258, also known as LIGHT, belongs to the tumor necrosis factor (TNF) superfamily. CD258 is a homotrimer composed of type II single-pass chains. The cleavage of this molecule from the cell surface results in a soluble form of LIGHT. CD258 stimulates T cell proliferation, CTL activity, Th1 cytokine production and induces apoptosis in some tumor lines. CD258 is expressed by T cells, NK cells, macrophages and platelets. The receptors of LIGHT are HVEM, LTβR and DCR3. CD258 has an important role in the cell-mediated immune response and in graft versus host disease.
