

An Affymetrix Company

Anti-Mouse CD150 APC

Catalog Number: 17-1502

Also known as: SLAM, Signaling lymphocyte activation molecule RUO: For Research Use Only. Not for use in diagnostic procedures.

Staining of C57Bl/6 splenocytes with Anti-Human/Mouse CD45R (B220) FITC (cat. 11-0452) and 0.06 ug of Rat IgG2b K Isotype Control APC (cat. 17-4031) (left) or 0.06 ug of Anti-Mouse CD150 APC (right). Total viable cells were used for analysis.

Product Information

Contents: Anti-Mouse CD150 APC

REF Catalog Number: 17-1502

Clone: mShad150 Concentration: 0.2 mg/mL Host/Isotype: Rat lgG2b

Formulation: aqueous buffer, 0.09% sodium azide, may contain carrier protein/stabilizer **Temperature Limitation:** Store at 2-8°C. Do not

freeze. Light sensitive material. **Batch Code:** Refer to vial **Use By:** Refer to vial

Description

The mShad150 monoclonal antibody reacts with mouse CD150, an ~70 kDa transmembrane glycoprotein also known as Signaling Lymphocyte Activation Molecule (SLAM). CD150 is expressed by T cells, in particular Th1, and B cells; this expression is rapidly upregulated upon activation. Immature thymocytes and dendritic cells also express this antigen. Signaling through SLAM in T cells induces proliferation and augmentation of the interferon-gamma response. Furthermore, SLAM is thought to play a role in adhesion between the T cell and antigen-presenting cell. The mShad150 antibody has been reported to also stain the CD150+CD244-CD48-CD41- population of pluripotent hematopoietic stem cells.

Applications Reported

This mShad150 antibody has been reported for use in flow cytometric analysis.

Applications Tested

This mShad150 antibody has been tested by flow cytometric analysis of mouse splenocytes. This can be used at less than or equal to 0.125 μ g per test. A test is defined as the amount (μ g) of antibody that will stain a cell sample in a final volume of 100 μ L. Cell number should be determined empirically but can range from 10⁵ to 10⁸ cells/test. It is recommended that the antibody be carefully titrated for optimal performance in the assay of interest.
