

Anti-Mouse Ly-108 APC

Catalog Number: 17-1508

Also known as: SLAM Family Receptor, SLAMF6

RUO: For Research Use Only. Not for use in diagnostic procedures.

Staining of C57Bl/6 splenocytes with Anti-Human/Mouse CD45R (B220) FITC (cat. 11-0452) and 0.125 ug of Mouse IgG2a K Isotype Control APC (cat. 17-4724) (left) or 0.125 ug of Anti-Mouse Ly-108 APC (right). Total viable cells were used for analysis.

Product Information

Contents: Anti-Mouse Ly-108 APC

Catalog Number: 17-1508

Clone: eBio13G3-19D (13G3-19D)

Concentration: 0.2 mg/mL

Host/Isotype: Mouse IgG2a, kappa

Formulation: aqueous buffer, 0.09% sodium azide, may contain carrier protein/stabilizer

Temperature Limitation: Store at 2-8°C. Do not freeze. Light-sensitive material.

Batch Code: Refer to vial

Use By: Refer to vial

Description

The eBio13G3-19D monoclonal antibody reacts with mouse Ly108, the mouse homologue of human SLAMF6 (signaling lymphocyte activation molecule family member 6). Mouse Ly108 is also known as NTB-A (NK cell, T cell, B cell antigen), and is expressed on NK, T cells, and B cells. Engagement of the Ly108 receptor enhances NK cell activity and expression of IFN-gamma, and contributes to the inability of NK cells to kill Epstein Barr virus-infected B cells in X-linked lymphoproliferative disease. CD4+ T cells from Ly108 knock-out mice exhibit diminished ability to produce IL-4 and defective neutrophil functions.

Staining has not revealed any strain differences between C57BL/6 and BALB/c mice. Other strains have not been tested.

Applications Reported

This eBio13G3-19D (13G3-19D) antibody has been reported for use in flow cytometric analysis.

Applications Tested

This eBio13G3-19D (13G3-19D) antibody has been tested by flow cytometric analysis of mouse splenocytes. This can be used at less than or equal to 0.25 µg per test. A test is defined as the amount (µg) of antibody that will stain a cell sample in a final volume of 100 µL. Cell number should be determined empirically but can range from 10⁵ to 10⁸ cells/test. It is recommended that the antibody be carefully titrated for optimal performance in the assay of interest.
