

Anti-Mouse gamma delta TCR APC

Catalog Number: 17-5711

RUO: For Research Use Only. Not for use in diagnostic procedures.

Staining of C57BL/6 lymph node with Anti-Mouse CD3e FITC (cat. 11-0031) and 0.25 ug of Armenian Hamster IgG Isotype Control APC (cat. 17-4888) (left) or 0.25 ug of Anti-Mouse gamma delta TCR APC (right). Total viable cells were used for analysis.

Product Information

Contents: Anti-Mouse gamma delta TCR APC

REF Catalog Number: 17-5711

Clone: eBioGL3 (GL-3, GL3)

Concentration: 0.2 mg/mL

Host/Isotype: Armenian Hamster IgG

Formulation: aqueous buffer, 0.09% sodium azide, may contain carrier protein/stabilizer

 **Temperature Limitation:** Store at 2-8°C. Do not freeze. Light sensitive material.

LOT **Batch Code:** Refer to Vial

 **Use By:** Refer to Vial

 **Caution, contains Azide**

Description

The GL3 monoclonal antibody reacts with the gamma delta T-cell Receptor complex (TCR) on all gamma delta TCR bearing T cells, but it does not react with alpha beta TCR. The gamma delta TCR is present on cells in the thymus, epidermis, epithelial lining of the intestine, peritoneal cavity, and lymphoid tissues.

Applications Reported

This GL3 (GL-3) antibody has been reported for use in flow cytometric analysis.

It is recommended to prestain cells with anti-mouse CD16/32 (cat. 14-0161) to prevent non-specific Fc-mediated binding of the GL3 monoclonal antibody.

Applications Tested

This eBioGL3 (GL-3, GL3) antibody has been tested by flow cytometric analysis of mouse lymph node cells. This can be used at less than or equal to 0.5 µg per test. A test is defined as the amount (µg) of antibody that will stain a cell sample in a final volume of 100 µL. Cell number should be determined empirically but can range from 10⁵ to 10⁸ cells/test. It is recommended that the antibody be carefully titrated for optimal performance in the assay of interest.
