

Anti-Human HLA-BC APC

Catalog Number: 17-5935

RUO: For Research Use Only. Not for use in diagnostic procedures.

Staining of normal human peripheral blood cells with Mouse IgG2b K Isotype Control APC (cat. 17-4732) (blue histogram) or Anti-Human HLA-BC APC (purple histogram). Cells in the lymphocyte gate were used for analysis.

Product Information

Contents: Anti-Human HLA-BC APC
Catalog Number: 17-5935
Clone: B1.23.2
Concentration: 5 μ L (0.125 μ g)/test
Host/Isotype: Mouse IgG2b, kappa

LOT

Formulation: aqueous buffer, 0.09% sodium azide, may contain carrier protein/stabilizer
Temperature Limitation: Store at 2-8°C. Do not freeze. Light-sensitive material.

Batch Code: Refer to vial

Use By: Refer to vial

Contains sodium azide

Description

This B1.23.2 monoclonal antibody recognizes the human Human Leukocyte Antigens (HLA) B and C. Along with HLA-A, these proteins correspond to MHC Class I in humans. HLA-B and HLA-C are expressed on nearly all cell types and heterodimerize with beta-2 microglobulin at the cell surface. These molecular complexes play a critical role in the presentation of endoplasmic reticulum-derived peptides to immune cells.

Applications Reported

This B1.23.2 antibody has been reported for use in flow cytometric analysis.

Applications Tested

This B1.23.2 antibody has been pre-titrated and tested by flow cytometric analysis of normal human peripheral blood cells. This can be used at 5 μ L (0.125 μ g) per test. A test is defined as the amount (μ g) of antibody that will stain a cell sample in a final volume of 100 μ L. Cell number should be determined empirically but can range from 10^5 to 10^8 cells/test.
