

Product Data Sheet

APC anti-mouse TCR V α 2

Catalog # / Size:	127809 / 25 µg 127810 / 100 µg		·
Clone:	B20.1		CARGE 1
Isotype:	Rat IgG2a, λ		
Immunogen:	Soluble TCR from mouse CTL clone KB5-C20	1) PE	
Reactivity:	Mouse	-201	3-1
Preparation:	The antibody was purified by affinity chromatography, and conjugated with APC under optimal conditions. The solution is free of unconjugated APC and unconjugated antibody.	CD3 (145	
Formulation:	Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide.		
Concentration:	0.2 mg/ml		2
Storage:	The antibody solution should be stored undiluted at 4°C and protected from prolonged exposure to light. Do not freeze.	C	B20.1 APC
Application	IS:	1	45-2C11 (CD3) PE and B20.1 APC
Applications:	FC - Quality tested		
Recommended Usage:	Each lot of this antibody is quality control tested by immunofluorescent stainin		

Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. F immunofluorescent staining, the suggested use of this reagent is $\leq 0.25 \ \mu$ g per 10⁶ cells in 100 μ l volume. It is recommended that the reagent be titrated for optimal performance for each application.

Application Notes: The B20.1 antibody recognizes most members of the V α 2 TCR subfamily in mice having the a, b, and c haplotypes.

3. Kao C, et al. 2005. Int. Immunol.17:1607. PubMed			
The TCR alpha (α) chain complexes with the TCR beta (β) chain to form the T cell receptor in 95% of T cells, whereas the remaining 5% of T cells express gamma and delta chains (γ/δ). TCR V α 2 is a distinct TCR subfamily found in mice having the a, b, and c haplotypes.
