

Description

This biotinylated peptide contains the residues surrounding threonine 197 of PKA. This peptide was generated for use as a substrate in heterogeneous or homogeneous kinase assays.

Quality Control

The quality of the biotinylated peptide was evaluated by reverse-phase HPLC and by mass spectrometry.

Peptide Core Sequence

RTWT*LCG

Molecular Weight

2205 daltons

Directions for Use

The phosphorylated form of the peptide can be detected with the Phospho-PKA C (Thr197) Antibody #4781.
