

## **Product Data Sheet**

## PerCP/Cy5.5 anti-human CD49d

Catalog # / Size: 304311 / 25 tests

304312 / 100 tests

Clone: 9F10

**Isotype:** Mouse IgG1,  $\kappa$ 

Workshop Number: V S215

Reactivity: Human, Cross-Reactivity: Baboon, Chimpanzee, Common Marmoset,

Cynomolgus, Rhesus, Squirrel Monkey, Horse (Equine), Cattle (Bovine,

Cow), Sheep (Ovine), Dog (Canine), Cat (Feline)

Preparation: The antibody was purified by affinity chromatography and conjugated with

PerCP/Cy5.5 under optimal conditions. The solution is free of unconjugated

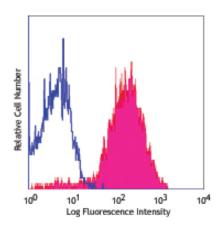

PerCP/Cy5.5 and unconjugated antibody.

Formulation: Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and

0.2% (w/v) BSA (origin USA).

Storage: The antibody solution should be stored undiluted at 4°C and protected from

prolonged exposure to light. Do not freeze.

Human peripheral blood lymphocytes stained with 9F10 PerCP/Cy5.5

## **Applications:**

Applications: FC - Quality tested

Recommended Usage: Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. For immunofluorescent staining, the suggested use of this reagent is 5 µl per million cells or 5 µl per 100 µl of whole blood. It is recommended that the reagent be titrated for optimal performance for each application.

\* PerCP/Cy5.5 has a maximum absorption of 482 nm and a maximum emission of 690 nm.

Application Notes: Additional reported applications (for the relevant formats) include: immunohistochemical staining of acetone-fixed frozen tissue sections, and in vitro T cell costimulation<sup>2,3</sup>. The LEAF<sup>TM</sup> Purified antibody (Endotoxin <0.1 EU/ $\mu$ g, Azide-Free, 0.2 µm filtered) is recommended for functional assays (Cat. No. 304310).

Cy3, Cy5, Cy5.5 and Cy7 are subject to proprietary rights of GE Healthcare Bio-Sciences Corp. and Carnegie Mellon University and made and sold under license from GE Healthcare Bio-Sciences Corp. Sale of this product is licensed

for research use only.

**Description:** CD49d is a 150 kD  $\alpha$  integrin chain known as  $\alpha_4$  integrin or VLA-4  $\alpha$  chain. It forms a heterodimer with either integrin  $\beta$ 1 ( $\alpha_4\beta_1$ , VLA-4) or  $\beta$ 7 ( $\alpha_4\beta_7$ ). CD49d is expressed broadly on T lymphocytes, B lymphocytes, monocytes, thymocytes, eosinophils, basophils, mast cells, NK cells, dendritic cells, and some non-hematopoietic cells, but not on normal red blood cells, platelets or neutrophils. VLA-4 binds to VCAM-1 (CD106) and fibronectin.  $\alpha_4\beta_7$  is the receptor for VCAM-1 and MAdCAM-1. CD49d participates in mononuclear cell trafficking to endothelial sites of inflammation and has roles in cell-cell interactions and cell adhesion to extracellular matrices. CD49d is involved in lymphocyte migration, T cell activation, and hematopoietic stem cell differentiation. CD49d is a marker to isolate pure populations of Treg cells due to its absence on Foxp3+ cells.
