

Description

This biotinylated peptide contains the residues surrounding tyrosine 160 of Signal Transduction Protein. This peptide was generated for use as a substrate in heterogeneous or homogeneous kinase assays.

Quality Control

The quality of the biotinylated peptide was evaluated by reverse-phase HPLC and by mass spectrometry.

Peptide Core Sequence

EGIY*DVP

Molecular Weight

1830 dalton

Directions for Use

The phosphorylated form of the peptide can be detected with the Phospho-Tyrosine mAb (P-Tyr-100) #9411.
