

IC Fixation Buffer

Catalog Number: 00-8222

GPR: General Purpose Reagents. For Laboratory Use.

Product Information

Contents: IC Fixation Buffer

 Catalog Number: 00-8222

Temperature Limitation: Store at 2-8°C. Use within 6 months of receipt. Cautions: Harmful if inhaled, swallowed or by contact.

Batch Code: Refer to Vial

Use By: Refer to Vial

Description

eBioscience Intracellular (IC) Fixation Buffer, used in conjunction with eBioscience Permeabilization Buffer (Cat. No. 00-8333), can be used to fix and permeabilize cells prior to performing intracellular staining of cytokines and other cytoplasmic and/or nuclear antigens. These solutions have been specially formulated for reducing non-specific staining by fluorochrome-labelled antibodies and increasing signal to noise ratios.

Applications Reported

This solution is at 1X working concentration and contains 4% Paraformaldehyde, which is toxic and suspected carcinogen. Contact with eyes, skin and mucous membranes should be avoided.
