

APC anti-human Ig light chain λ

Catalog # / Size: 316609 / 25 tests
316610 / 100 tests

Clone: MHL-38

Isotype: Mouse IgG2a, κ

Immunogen: Human Ig cocktail

Reactivity: Human

Preparation: The antibody was purified by affinity chromatography, and conjugated with APC under optimal conditions. The solution is free of unconjugated APC and unconjugated antibody.

Formulation: Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide and 0.2% (w/v) BSA (origin USA).

Storage: The antibody solution should be stored undiluted at 4°C and protected from prolonged exposure to light. **Do not freeze.**

Human peripheral blood lymphocytes stained with CD19 PE and MHL-38 APC

Applications:

Applications: FC - *Quality tested*

Recommended Usage: Each lot of this antibody is quality control tested by immunofluorescent staining with flow cytometric analysis. **Test size products are transitioning from 20 μ l to 5 μ l per test.** Please check your vial or your CoA to find the suggested use of this reagent per million cells in 100 μ l staining volume or per 100 μ l of whole blood. It is recommended that the reagent be titrated for optimal performance for each application. Read more at www.biolegend.com/testsize regarding the test size change.

Description: The MHL-38 antibody reacts with both soluble and membrane human immunoglobulin light chain lambda (λ). It does not react with human immunoglobulin light chain kappa (κ) or heavy chain (μ). The MHL-38 antibody can be used as primary or secondary reagent for immunofluorescent staining or ELISA analysis.
