Technical Data Sheet

BV711 Mouse IgG2b, κ Isotype Control

Product Information

 Material Number:
 563125

 Alternate Name:
 Anti-Dansyl

 Size:
 50 μg

 Concentration:
 0.2 mg/ml

 Clone:
 27-35

Isotype: Mouse (C.SW) IgG2b, κ

Storage Buffer: Aqueous buffered solution containing BSA and ≤0.09% sodium azide.

Description

The mouse IgG2b, κ immunoglobulin isotype control monoclonal antibody 27-35 is specific for the hapten dansyl (5-[dimethylamino] naphthalene-1-sulfonyl). This hapten is not expressed on human cells or human cell lines. The 27-35 immunoglobulin was selected as an isotype control following testing which demonstrated low background staining on a variety of mouse and human tissues.

The antibody was conjugated to BD HorizonTM BV711 which is part of the BD HorizonTM Brilliant VioletTM family of dyes. This dye is a tandem fluorochrome of BD HorizonTM BV421 with an Ex Max of 405-nm and an acceptor dye with an Em Max at 711-nm. BD HorizonTM BV711 can be excited by the violet laser and detected in a filter used to detect CyTM5.5 / Alexa Fluor® 700-like dyes (eg, 712/20-nm filter). Due to the excitation and emission characteristics of the acceptor dye, there may be moderate spillover into the Alexa Fluor® 700 and PerCP-CyTM5.5 detectors. However, the spillover can be corrected through compensation as with any other dye combination.

Preparation and Storage

Store undiluted at 4°C and protected from prolonged exposure to light. Do not freeze.

The monoclonal antibody was purified from tissue culture supernatant or ascites by affinity chromatography.

The antibody was conjugated with BD HorizonTM BV711 under optimum conditions, and unconjugated antibody and free BD HorizonTM BV711 were removed.

Application Notes

Application

Application	
Flow cytometry	Routinely Tested
Isotype control	Routinely Tested

Suggested Companion Products

Catalog Number	Name	Size	Clone
554656	Stain Buffer (FBS)	500 ml	(none)

Product Notices

- 1. Since applications vary, each investigator should titrate the reagent to obtain optimal results.
- 2. Source of all serum proteins is from USDA inspected abattoirs located in the United States.
- 3. An isotype control should be used at the same concentration as the antibody of interest.
- 4. Please refer to www.bdbiosciences.com/pharmingen/protocols for technical protocols.
- 5. Caution: Sodium azide yields highly toxic hydrazoic acid under acidic conditions. Dilute azide compounds in running water before discarding to avoid accumulation of potentially explosive deposits in plumbing.
- 6. For fluorochrome spectra and suitable instrument settings, please refer to our Multicolor Flow Cytometry web page at www.bdbiosciences.com/colors.
- 7. Alexa Fluor® is a registered trademark of Molecular Probes, Inc., Eugene, OR.
- 8. Cy is a trademark of Amersham Biosciences Limited.
- Brilliant VioletTM 711 is a trademark of Sirigen.
