Technical Data Sheet

BV786 Mouse Anti-Human CD3

Product Information

Material Number: 563800

Alternate Name: CD3-epsilon; CD3E; Leu4; T-cell surface antigen T3/Leu-4 epsilon chain; T3E

 Size:
 100 tests

 Vol. per Test:
 5 μl

 Clone:
 SK7 (also known as Leu-4)

 Immunogen:
 Human Thymocytes

 Isotype:
 Mouse (BALB/c) IgG1, κ

 Reactivity:
 QC Testing: Human

 Workshop:
 II T118; III T492

Storage Buffer: Aqueous buffered solution containing BSA and ≤0.09% sodium azide.

Description

The SK7 (Leu-4) monoclonal antibody specifically binds to the epsilon chain of the CD3 antigen/T-cell antigen receptor (TCR) complex. This complex is composed of at least six proteins that range in molecular weight from 20 to 30 kDa. The antigen recognized by CD3 antibodies is noncovalently associated with either α/β or γ/δ TCR (70 to 90 kDa). The CD3 antigen is present on 61% to 85% of normal peripheral blood lymphocytes 60% to 85% of thymocytes and on Purkinje cells in cerebellum. The soluble form of this antibody has a mitogenic effect on most peripheral blood T lymphocytes, provided appropriate functional monocytes are present.

The antibody was conjugated to BD HorizonTM BV786 which is part of the BD HorizonTM Brilliant VioletTM family of dyes. This dye is a tandem fluorochrome of BD HorizonTM BV421 with an Ex Max of 405-nm and an acceptor dye with an Em Max at 786-nm. BD HorizonTM BV786 can be excited by the violet laser and detected in a filter used to detect Cy7TM-like dyes (eg, 780/60-nm filter).

Flow cytometric analysis of CD3 expression on human peripheral blood lymphocytes. Whole blood was stained with BD Horizon™ BV786 Mouse Anti-Human CD3 antibody (Cat. No. 563799/563800; solid line histogram) or BD Horizon™ BV786 Mouse IgG1, κ Isotype Control (Cat. No. 563330; dashed line histogram). Erythrocytes were lysed with BD FACS™ Lysing Solution (Cat. No. 349202). The fluorescence histograms were derived from gated events with the forward and side light-scatter characteristics of intact lymphocytes. Flow cytometric analysis was performed using a BD™ LSR II Flow Cytometer System.

Preparation and Storage

Store undiluted at 4°C and protected from prolonged exposure to light. Do not freeze

The monoclonal antibody was purified from tissue culture supernatant or ascites by affinity chromatography.

The antibody was conjugated with BD HorizonTM BV786 under optimum conditions, and unconjugated antibody and free BD HorizonTM BV786 were removed.

Application Notes

Application

Flow cytometry Routinely Tested

Suggested Companion Products

Catalog Number	<u>Name</u>	Size	Clone	
554656	Stain Buffer (FBS)	500 ml	(none)	
563330	BV786 Mouse IgG1, k Isotype Control	50 μg	X40	
563799	BV786 Mouse Anti-Human CD3	25 tests	SK7	
349202	BD FACS™ Lysing Solution	100 ml	(none)	
555899	Lysing Buffer	100 ml	(none)	

Product Notices

- This reagent has been pre-diluted for use at the recommended Volume per Test. We typically use $1 \times 10^{\circ}6$ cells in a 100- μ l experimental
- 2. Source of all serum proteins is from USDA inspected abattoirs located in the United States.
- An isotype control should be used at the same concentration as the antibody of interest.
- Please refer to www.bdbiosciences.com/pharmingen/protocols for technical protocols.
- Caution: Sodium azide yields highly toxic hydrazoic acid under acidic conditions. Dilute azide compounds in running water before discarding to avoid accumulation of potentially explosive deposits in plumbing.
- For fluorochrome spectra and suitable instrument settings, please refer to our Multicolor Flow Cytometry web page at 6 www bdbiosciences com/colors
