

Certificate of Origin

Product: Rabbit (polyclonal) Anti- Tau [pT²³¹] Phosphospecific Antibody, Unconjugated

Catalog Number: 44746G

Country of Manufacture: This product is manufactured in the United States.

Animal Derived Components: Purified from rabbit serum by sequential epitope-specific chromatography. The rabbit serum from which this antibody was purified is of U.S. origin and the rabbits from which the serum was collected were specific pathogen free.

Bovine Serum Albumin (BSA) is added as a carrier protein. The animals from which this material was derived are of U.S. origin. The animals were ≤ 30 months of age, slaughtered in USDA licensed establishments, and received ante- and post-mortem inspections indicating they were apparently free from infections, contagious diseases and injurious parasites. A Certificate of Suitability (RO-CEP-2003-204) is on file.
