

Incubation Trays

Catalog no. LC2102

Store at room temperature

Description

The Incubation Tray is designed to facilitate the processing of western blots. The tray is reusable, optically clear with a sealable lid, and is suitable for most western detection and immunostaining applications.

Important: The Incubation Tray is **NOT** heat-resistant and cannot be heated in a microwave oven or autoclaved.

Specifications

Quantity:	8/pk
Tray Dimensions:	10 cm x 14 cm
Volume Capacity:	400 ml
Tray Material:	APET (amorphous polyethylene terephthalate)

Chemical Resistance

The Incubation Tray is compatible with most detection reagents including weak acids, alcohols and organic solvents but is not compatible with strong acids or alkali.

Part No. LC2102.pps

Rev. Date: 20 Dec 2004

This product is distributed for laboratory research only. **CAUTION:** Not for diagnostic use. The safety and efficacy of this product in diagnostic or other clinical uses has not been established.
