

References for Product 36005

1. Vasilyev DV, Shan QJ, Lee YT, Soloveva V, Nawoschik SP, Kaftan EJ, Dunlop J, Mayer SC, Bowlby MR. (2009) A novel high-throughput screening assay for HCN channel blocker using membrane potential-sensitive dye and FLIPR. *J Biomol Screen*, 14, 1119.
2. Solly K, Cassaday J, Felix JP, Garcia ML, Ferrer M, Strulovici B, Kiss L. (2008) Miniaturization and HTS of a FRET-based membrane potential assay for K(ir) channel inhibitors. *Assay Drug Dev Technol*, 6, 225.
3. Weinglass AB, Swensen AM, Liu J, Schmalhofer W, Thomas A, Williams B, Ross L, Hashizume K, Kohler M, Kaczorowski GJ, Garcia ML. (2008) A high-capacity membrane potential FRET-based assay for the sodium-coupled glucose co-transporter SGLT1. *Assay Drug Dev Technol*, 6, 255.
4. Liu CJ, Priest BT, Bugianesi RM, Dulski PM, Felix JP, Dick IE, Brochu RM, Knaus HG, Middleton RE, Kaczorowski GJ, Slaughter RS, Garcia ML, Kohler MG. (2006) A high-capacity membrane potential FRET-based assay for NaV1.8 channels. *Assay Drug Dev Technol*, 4, 37.
5. Benjamin ER, Skelton J, Hanway D, Olanrewaju S, Pruthi F, Ilyin VI, Lavery D, Victory SF, Valenzano KJ. (2005) Validation of a fluorescent imaging plate reader membrane potential assay for high-throughput screening of glycine transporter modulators. *J Biomol Screen*, 10, 365.
6. Felix JP, Williams BS, Priest BT, Brochu RM, Dick IE, Warren VA, Yan L, Slaughter RS, Kaczorowski GJ, Smith MM, Garcia ML. (2004) Functional assay of voltage-gated sodium channels using membrane potential-sensitive dyes. *Assay Drug Dev Technol*, 2, 260.
7. Jensen AA, Brauner-Osborne H. (2004) Pharmacological characterization of human excitatory amino acid transporters EAAT1, EAAT2 and EAAT3 in a fluorescence-based membrane potential assay. *Biochem Pharmacol*, 67, 2115.
8. Jensen AA, Kristiansen U. (2004) Functional characterisation of the human alpha1 glycine receptor in a fluorescence-based membrane potential assay. *Biochem Pharmacol*, 67, 1789.
9. David LS, Plakas SM, El Said KR, Jester EL, Dickey RW, Nicholson RA. (2003) A rapid assay for the brevetoxin group of sodium channel activators based on fluorescence monitoring of synaptoneurosomal membrane potential. *Toxicon*, 42, 191.
10. Fitch RW, Xiao Y, Kellar KJ, Daly JW. (2003) Membrane potential fluorescence: a rapid and highly sensitive assay for nicotinic receptor channel function. *Proc Natl Acad Sci U S A*, 100, 4909.
11. Huang SG. (2002) Development of a high throughput screening assay for mitochondrial membrane potential in living cells. *J Biomol Screen*, 7, 383.
12. Zhu C, Jiang L, Chen TM, Hwang KK. (2002) A comparative study of artificial membrane permeability assay for high throughput profiling of drug absorption potential. *Eur J Med Chem*, 37, 399.
13. Farrelly E, Amaral MC, Marshall L, Huang SG. (2001) A high-throughput assay for mitochondrial membrane potential in permeabilized yeast cells. *Anal Biochem*, 293, 269.
14. Ogawa Y, Nishioka A, Kobayashi T, Kariya S, Hamasato S, Saibara T, Seguchi H, Yoshida S. (2001) Radiation-induced apoptosis of human peripheral T cells: analyses with cDNA expression arrays and mitochondrial membrane potential assay. *Int J Mol Med*, 7, 603.
15. Chanda B, Mathew MK. (1999) Functional reconstitution of bacterially expressed human potassium channels in proteoliposomes: membrane potential measurements with JC-1 to assay ion channel activity. *Biochim Biophys Acta*, 1416, 92.
16. Gaskova D, Brodska B, Holoubek A, Sigler K. (1999) Factors and processes involved in membrane potential build-up in yeast: diS-C3(3) assay. *Int J Biochem Cell Biol*, 31, 575.
17. Gaskova D, Brodska B, Herman P, Vecer J, Malinsky J, Sigler K, Benada O, Plasek J. (1998) Fluorescent probing of membrane potential in walled cells: diS-C3(3) assay in *Saccharomyces cerevisiae*. *Yeast*, 14, 1189.

18. Rottenberg H, Wu S. (1998) Quantitative assay by flow cytometry of the mitochondrial membrane potential in intact cells. *Biochim Biophys Acta*, 1404, 393.
19. Azas N, Di Giorgio C, Delmas F, Gasquet M, Timon-David P. (1997) Assessment of amphotericin B susceptibility in *Leishmania infantum* promastigotes by flow cytometric membrane potential assay. *Cytometry*, 28, 165.
20. Sieuwerts AM, Klijn JG, Foekens JA. (1997) Assessment of the invasive potential of human gynecological tumor cell lines with the in vitro Boyden chamber assay: influences of the ability of cells to migrate through the filter membrane. *Clin Exp Metastasis*, 15, 53.
21. Ordonez JV, Wehman NM. (1995) Amphotericin B susceptibility of *Candida* species assessed by rapid flow cytometric membrane potential assay. *Cytometry*, 22, 154.
22. Mohler JL, Sharief Y. (1993) Flow cytometric assay of pinocytosis: correlation with membrane ruffling and metastatic potential in the Dunning R-3327 rat prostatic adenocarcinoma model. *Cytometry*, 14, 826.
23. Parish CR, Jakobsen KB, Coombe DR. (1992) A basement-membrane permeability assay which correlates with the metastatic potential of tumour cells. *Int J Cancer*, 52, 378.
24. Eddy AA. (1989) Use of carbocyanine dyes to assay membrane potential of mouse ascites tumor cells. *Methods Enzymol*, 172, 95.
25. Lambotte L. (1970) Hepatic cell membrane potential a new assay for preserved organs viability. *Eur Surg Res*, 2, 241.
26. Lambotte L, Saey A. (1969) Liver-cell resting membrane potential as a direct viability assay of preserved organs. *Br J Surg*, 56, 693.
